Unplug From Technology And Find Space For Yourself

Waking up and checking the phone first thing in the morning: Is that you? No wonder this has become a common scenario around us. Smartphones and laptops have become inseparable parts of our lives. We tend to spend countless hours glued to the screen, whether we are at work, conference, chatting, or streaming. Being updated is the need of the hour but not at the cost of your wellness. It is high time that you need to get rid of unhealthy attachments from your devices to be more mindful of your existence. Here are some ways to unplug from technology and find space for yourself.

Unplug before waking up and before going to bed - If you reach for your phone first thing in the morning and can't fall asleep before checking your emails, you need to rethink your routine. Banish all the electronic devices from the bedroom before falling asleep and consider a standalone alarm clock for waking up. This way, you can put your phone in another room without making the excuse that you need to wake up with its help.

A new hobby - You might be surprised to know that there are plenty of hobbies that you can fulfill without any internet connection in this era of hyper-connectedness. Go for

embroidery, knitting, art and craft, cooking, gardening, or playing board games, and the choices are endless.

Turn off all the phone notifications - Just silence all the notifications, and concentrate on what you are doing at present. Even if you are going to meet a friend or going to attend an event, don't just get yourself busy clicking photos. Set aside your phone and let yourself enjoy the moments. You will be happier than ever before.

Unplugging from technology is easier said than done. But make a commitment to yourself, and you will taste the success. Happy unplugging!

CT UNIVERSITY'S DEPARTMENT OF ROBOTICS & INNOVATION INVENTED CLASSIFIER: THE GLASS FINDER

The Department of Robotics & innovation and School of Hotel Management, Airlines and Tourism, CT University is fulfilling all the needs of students and providing world-class knowledge to students by giving hands-on experience of science and innovations for different social needs. Covid-19 has taught us many things. To be conscious of the problem of used glasses at a party or in a Bar and the hygiene of using other person's glasses, Prof. (Dr.) Amit Kumar, HoS- School of Hotel Management, Airlines and Tourism, and Dr. Harmeet Singh, Deputy Director IPR Cell of the CT University came up with an idea to develop a device to solve this problem. The device was developed in the Robotics lab with

help of Gurkirat Singh, Lab Technician, Robotics & innovation, CTU, and a Student of BCA, Satyam Gupta. The Device consists of a Screen, RFID Reader, and a controller. The

Device was 3D Printed in the Robotics Lab. The main function of the device is to detect the actual user of the glass. Dr. Harmeet Singh added, that the user will put the glass on the Classifier device and it will display the name of the person to whom the glass belongs. The glass has an integrated RFID tag and the glasses are completely washable. Further, Dr. Amit Kumar added, that this innovative device will solve many issues especially related to the spread of infection or any diseases. This Classifier device can be placed at any corner of the bar or home during parties. The future improvement will include the connectivity of the device with the server so that all the devices will be synchronized.

A GLIMPSE OF ART WORK DONE BY OUR YOUNG ARTISTS OF FOUNDATION PROGRAM AT CT GROUP

PROUD MOMENT

SCHOOL OF LAW CT UNIVERSITY ORGANISES "THE SCAMNUM"

CT University, Ludhiana, Punjab organized the Intra School Moot Court Competition 2022, "THE SCAMNUM" for polishing the young minds with a legal skill set. Moot Court Competitions provide budding lawyers an opportunity to test their skills for Professional competence. The Moot Court Sessions consist of a series of legal challenges on areas of law and their development in an academically constituted court. It creates an

environment where students can assume the courtroom responsibilities. Students enthusiastically participated in the first day of Intra School moot court competition, "THE SCAMNUM" and given the opportunity, a total of 15 teams participated in the event. The Moot proposition was based on Constitutional Law. Out of 15 teams, 4 teams qualified for the semi-finals and 2 were selected for the final round. The final round was judged by a panel consisting of Principal

School of Law Dr Simranjeet Kaur Gill, Dr. Divya Khurana and Raminder Singh. Principal Dr. Simranjeet Kaur Gill apprised the participants with the working of courts. She also spoke about the conduct of lawyers. The Trophy was Lifted by the Students of TC-09- Vishwas Vaid, Vineet Jain & Tanveer Kalsi of B.A.,LL.B. 1st year and Students of TC- 03- Priyanka & Parul of B.A.,LL.B. 3rd year won the runner-up Trophy. Vishwas Vaid was adjudged as best Mooter.

CT UNIVERSITY SPREADS MESSAGE OF "SOCIAL EMPATHY"

Under the campaign of 'Social Empathy' School of Humanities And Physiccal Education's department Sociology of CT University organized a visit to meet orphan children living in SGB Bal Ghar village Talwandi khurd ,Ludhiana. This visit was organized under the supervision of Dr. Pravin Sharma, Dean Sports and Head of the School of Humanities and Physical education of University. CT University's 42 students along with Arshpreet Kaur Sandhu, Assistant Prof. Sociology visited the Bal Ghar for the

activity on "Social Emaphy" to promoted the

social well being. The students planned various

activities on 'trust', 'make believe' and 'role play'. Apart from these activities, students had collected a huge amount of grocery to donate. It was a playful and meaningful activity for both students and children. The campaign concluded with vote of thanks to trustees of SGB Bal Ghar, students and staff those who took initiative by Dr Harsh Sadawarti, Vice-Chancellor, CT University on saying that we are social creatures and nature has sent us on earth to help each other.
