THE LONGEST WORD IN ENGLISH HAS 189,819 LETTERS.

The complete name of the protein that goes by the moniker titin would take three and a half hours to say out loud, so we won't say it here. The longest term in the Oxford English Dictionary has 45 letters, while the longest made-up word only has 28. This is by far the longest word in the English language. Just some more fascinating information for your upcoming cocktail party.
